## AELIUS LED TRADE UP PROGRAM

If there is one constant in this world, it is that technology is rapidly changing; and the horticultural lighting industry is no different. Our Aelius LED designers are continuously looking at improving our existing line and innovating new designs and spectrum “recipes,” that is why we have introduced the industry’s ONLY Trade-Up program.

Up to 30 months after your purchase we invite you to trade your lights in for a newer, more powerful Aelius LED product for a rebate towards your new light.

The maximum trade in rebate available is 25% of your original purchase price. Trade in value will be determined by the condition and age of your lights. The fixtures will be assessed based on criteria similar to that of our Fixture Warranty.

Fixtures must be in serviceable condition with all LED chips in working order and have none of the following deficiencies:

- Tamperproof sticker altered or removed
- Fixture is disassembled
- Unauthorized rewiring of electrical components
- Damage due to dropped fixture or severe impact
- Electrical surges/spikes
- Submersion in water, water found internally
- Painting of fixture

Damaged fixtures shall be excluded from the Trade-Up Program. The trade in rebate shall be in the form of a credit applied to future purchases. Shipping costs (if applicable) will be at the customer’s expense. Please contact sales@aeliusled.com or give us a call to take advantage of this program.
